

BIM

BIM IQ®

Like smartphones have revolutionized how people communicate, BIM IQ® will revolutionize Building Information Modeling (BIM). How does it differ from BIM? Change the glass option or mullion design—only BIM IQ® will show you that change from any view of your project, interior or exterior, in its precise location, on any day of the year! That's right, and you not only see what it looks like, BIM IQ® calculates the energy data based on your selections—no waiting. **Visit BIMIQ.com** and submit your project to see if it is a candidate for BIM IQ®.
